Georgia Fraud Report

Our Elections are an Illusion – 3

Georgia is not only not compliant with National Voter Registration Act of 1993 (NVRA), there is strong evidence of criminality in all areas of the Voter Database.

Article I, Sec. 4, Clause 1 of the US Constitution (The Election Clause) states “*enabling states to provide a complete code for congressional elections, not only as to times and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practice, counting of votes,...*” Georgia appears to not only not comply, there is strong evidence of criminality in each of the underlined responsibilities.

Georgia is also not compliant with Help America Vote Act of 2002 (HAVA) which states “The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly...”

The GA Nerds have PROVEN - *The entirety of the Georgia voter registration and balloting system is fraudulent, unreliable, easily manipulated, and renders our elections void and invalid. The current system deprives and dilutes the constitutionally protected rights of qualified electors of their right to vote and have that vote count. There is at the least maladministration and at worst fraud being perpetrated upon the People via: Identity Theft; Absentee Ballots; swapping of votes; inserting votes; the counting of votes of impossible or phantom registrants; and the manipulation of the voter registration database before, during, and for months after the election period.*
